

Memorandum

To: All Faculty and Staff
From: Dr. Matthew W. Ross, Superintendent
Date: August 1, 2018
Subject: Policy and Procedure Bulletin_KleenSlates

The intent of this memorandum is to provide guidance with regard to the use of KleenSlates, or other versions of student response systems.

The use of KleenSlates, or other versions of student response systems, makes a lesson more effective, interactive, and fun. Therefore, the use of KleenSlates, or other versions of student response systems, shall be used (at a minimum) in every Mathematics lesson; the use of these tools works well with spelling, vocabulary, and language arts where content can be chunked.

By using these tools:

- You can engage every student in every lesson
- You will know what every student knows, at any moment during the instruction
- Students can make mistakes during guided practice that can be addressed prior to independent practice

If you have any questions or a need any assistance regarding this memorandum, please do not hesitate to contact us.
