

# Youth 12 & Older

Now eligible for safe & effective COVID-19 vaccines

## What are the benefits?

### No need to quarantine

If exposed, kids won't have to spend time away from school, sports or extracurriculars, unless they have symptoms or test positive.

### Protect others

Kids can be around their friends, teachers, parents, and grandparents, without having to worry about making them sick.

### Return to normal

The more people who are vaccinated, the closer we will get to herd immunity. This is a big step toward returning to our pre-Covid routines and activities.
